

Dear All,

Dear Mrs. Kimura, can you upload this to the website.

We propose a small change to the standard proposal. This change would increase the interoperability:

On page Part 4, §3.6 Calculation Chain, page 2084 we propose to add a sentence to the end of last paragraph of the page:

If the calculation chain is found to be inconsistent with the cell values, it shall be ignored.

This would guarantee that inconsistencies between cell values and calculation chain would not have an adverse effect on application level.

best regards
Aki Siponen
