

## GB proposal for changes to table in Response 782

Change the table in the Response 782 to read (changes from the current):

|     |  |
|-----|--|
| \k  | Divide filesize by 1000 and round to the nearest integer (transitional)    |
| \m  | Divide filesize by 1000000 and round to the nearest integer (transitional) |
| \kb | Divide filesize by 1024 and round to the nearest integer                   |
| \mb | Divide filesize by 1048576 and round to the nearest integer                |

Change the example that follows this table to read:

[*Example*: Consider the case in which the document's size is 4,660,736 bytes and the following fields are updated:

```
FILESIZE \# #,##0  
FILESIZE \kb  
FILESIZE \mb
```

the results are:

```
4,660,736  
4552  
4
```

*end example*]
